Entered according to Act of Congress, in the year 1894, By James B. Clow & Son, In the office of the Librarian of Congress, at Washington, D. C.

# SPECIAL NOTICE.

# Monthly Settlements Unless Otherwise Agreed Upon.

Bank remittances must be made with Chicago or New York Exchange.

All claims for corrections or deductions must be made within ten days after receipt of goods.

ALL GOODS, AFTER SHIPMENT, AT RISK OF PURCHASER. Our responsibility ceases when we obtain receipt from transportation company. Claims for breakage should be made on transportation company.

Boxing and cartage charged at cost.

Insurance will not be placed on shipments unless requested. All shipments will be made at "owner's risk" rates unless we are directed on each order to ship at "company risk."

To avoid mistakes in ordering, please specify CATALOGUE FIGURE.

All goods returned should be accompanied by a **LETTER OF ADVICE** and invoice covering such goods to insure prompt credits.

Discount sheets will be issued, but ALL QUOTATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.

All contracts subject **TO DELAYS** from strikes, accidents, or causes beyond our control.

ERRORS.—We make them; so does every one, and we will cheerfully correct them if you will write to us. Try to write us good-naturedly, but if you cannot, then write us any way. Do not let an error pass unnoticed, or complain to your friends or neighbors about it. We want an early opportunity to make right any mistakes that may occur.

Please destroy all previous editions of our catalogue.

JAMES B. CLOW & SON.

# Special.

We manufacture, or represent, as agents, manufacturers of every article used in the construction and maintenance of WATER WORKS PLANTS.

# Bonds and Warrants.

We solicit correspondence from cities, towns, villages, or companies who wish to dispose of Bonds or Warrants for the purpose of building NEW or extending existing WATER WORKS PLANTS.

#### CAST-IRON PIPE.

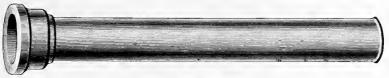

FIG. 1.

# CAST-IRON WATER PIPE. Standard Weight.

SIZE INCHES	3	-4	6	8	10	12	14	16	18	20	24	30	36	43	48	60
THICKNESS INCHES WEIGHT PER FOOT POUNDS	$\begin{array}{c} \frac{1}{2} \\ 17 \end{array}$	1/2 22	$\frac{\frac{1}{2}}{33}$	$\frac{\frac{1}{2}}{42}$	16 60	75 75	$\frac{3}{117}$	$\frac{3}{4}$ 125	167	197	1 250	$\frac{11}{350}$	1 <del>8</del> 475	$\frac{1\frac{3}{8}}{600}$	$\frac{1\frac{1}{2}}{775}$	$\begin{array}{c} 2 \\ 1330 \end{array}$

Weights given are standard, but can be changed when pipe is made to order. Coated inside and out and tested 300 lbs. per square inch, hydrostatic pressure. Above weight pipe carried in stock both at foundries and in Chicago.

# CAST-IRON GAS PIPE.—Standard Weight.

SIZE INCHES	3	4	6	8	10	12	14	16	18	20	24	30	36	42	48	60

We make all sizes and reductions in specials, from 2 to 48 inch, and carry a large stock constantly on hand, both at our Foundries and in Chicago. If in stock, and unless otherwise specified, we will fill all orders with Bell End Specials. The above weights are given as standard simply for the purpose of estimating, and are approximately correct. All our Specials are made with full water-way and easy bends.

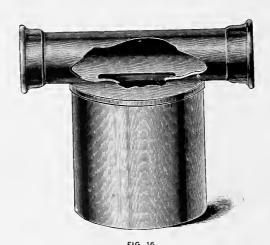

All descriptions of special water-works castings made to order, including Flanged Pipe and all special pump connections.

FLEXIBLE OR BALL PIPE JOINTS.

SIZE INCHES	4	6	8	10	12	14	16	20	24
EACH	32.00	50.00	65,00	80.00	90.00	100.00	110.00	175.00	250.00

All of our Joints are positively water-tight, and are tested at 300 pounds per square inch hydrostatic pressure.

DRIP BOXES.

All sizes, from 3 to 36 inches. We also have patterns for all castings pertaining to gas-works.

The above prices are for tubes up to 20 feet long. For tubes in excess of that length, 10 per cent will be added to net of invoice.

Extra thickness of tubes will be charged as per list of extra gauges.

No deduction for tubes lighter than standard.

# EXTRA WIRE GAUGE OF BOILER TUBES AWAY FROM STANDARD.

For EXTRA wire gauge "Boiler Tubes" away from standard, not exceeding four wire gauges, add one cent for each inch in diameter to the net price per foot for each additional gauge. To calculate price, take discount from list prices of regular Tubes and add net charge for extra wire gauge.

For 1 number.	For 2 numbers,	For 3 numbers.	For 4 numbers.
$\begin{array}{cccccccccccccccccccccccccccccccccccc$	$\begin{array}{cccc} 2 & \text{inch, 4c} \\ 2\frac{1}{4} & & 4\frac{1}{2}c \\ 2\frac{1}{2} & & 5c \end{array}$	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	$\begin{array}{cccccccccccccccccccccccccccccccccccc$

Beyond four numbers, price is per pound. Swaging or swelling 2 inch or  $2\frac{1}{4}$  inch Tubes, 5c per end extra.

Cutting screws on Tubes, 80c per hour.

# STANDARD WELL CASING.

FOR ARTESIAN, SALT, OIL, AND GAS WELLS.

# Special.

# PIPE CUT TO ORDER.

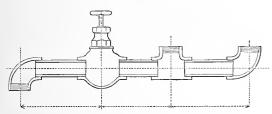

FIG. 44. DIAGRAM SHOWING SCREWED JOINTS.

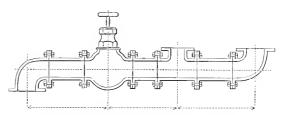

FIG. 45. DIAGRAM SHOWING FLANGED JOINTS.

We have every facility for cutting and fitting all sizes of pipe to diagram.

In ordering, great care should be taken in making diagrams; and all measurements given center to center. It is always advisable to state purpose for which pipe is to be used and pressure it must stand.

If Flanged Fittings are used, state if desired drilled, and if with Bolts and Gaskets complete.

#### TEES-BULL HEAD.

Tees with both ends of run the same size, with the outlet larger, thus:  $1 - \frac{2}{1 - 1}$  are known as Bull Head, and are read, 1 x 2.

$\frac{3}{8}$ X $\frac{1}{2}$	$\frac{3}{4} \times 1\frac{1}{4}$	1 <sup>1</sup> / <sub>4</sub> x 2	$2 \times 3^{\frac{1}{2}}$	$3\frac{1}{2} \times 4$	6 x 7
$\frac{1}{2} \times 1$	3 x 1	$1\frac{1}{4} \times 1\frac{1}{2}$	$2\frac{1}{2} \times 4$	4 x 6	
$\frac{1}{2}$ X $\frac{3}{4}$	1 x 2	$1\frac{1}{2} \times 2\frac{1}{2}$	$2\frac{1}{2} \times 3$	4 x 5	
3 x 2	$1 \times 1\frac{1}{2}$	$1\frac{1}{2} \times 2$	3 x 4	5 x 6	
3 x 1 <del>1</del>	$1 \times 1^{\frac{1}{4}}$	2 x 3	$3 \times 3\frac{1}{2}$	6 x 8	

### CROSSES.

#### CROSSES-REDUCING ON OUTLETS.

The outlets of a Cross are always the same size, and are indicated by the last figure.

Thus: A Cross 
$$\frac{3}{4}$$
  $\frac{\frac{1}{2}}{\frac{1}{2}}$   $-\frac{3}{4}$  is called a  $\frac{3}{4}$  x  $\frac{1}{2}$  Cross.

$\frac{3}{4} \times \frac{1}{2}$	$1\frac{1}{2} \times 1$	$2\frac{1}{2} \times 2$	3 x $1\frac{1}{2}$	4 x 3	6 x 5
$1 \times \frac{3}{4}$	$1\frac{1}{2} \times \frac{3}{4}$	$2\frac{1}{2} \times 1\frac{1}{2}$	3 x 1 <sup>1</sup> / <sub>4</sub>	$4 \times 2\frac{1}{2}$	6 x 4
1 x $\frac{1}{2}$	$1\frac{1}{2} \times \frac{1}{2}$	$2\frac{1}{2} \times 1\frac{1}{4}$	3 x 1	4 x 2	6 x 3
$1\frac{1}{4} \times 1$	$2 \times 1^{\frac{1}{2}}$	$2\frac{1}{2} \times 1$	$3 \times \frac{3}{4}$	5 x 4	$6 \times 2\frac{1}{2}$
$1\frac{1}{4} \times \frac{3}{4}$	$2 \times 1\frac{1}{4}$	$2\frac{1}{2} \times \frac{3}{4}$	$3\frac{1}{2} \times 3$	5 x 3	6 x 2
$1\frac{1}{4} \times \frac{1}{2}$	2 x 1	3 x $2\frac{1}{2}$	$3\frac{1}{2} \times 2\frac{1}{2}$	$5 \times 2\frac{1}{2}$	
$1\frac{1}{2} \times 1\frac{1}{4}$	$2 \times \frac{3}{4}$	3 x 2	4 x $3\frac{1}{2}$	5 x 2	

# CROSSES-REDUCING ON RUN.

A Cross reducing on the run, thus,  $1\frac{1}{2}$ — $\frac{1}{1}$  is called a  $1\frac{1}{2}$  x  $1\frac{1}{4}$  x 1 Cross.

REDUCING ON RUN	$1\frac{1}{2} \times 1\frac{1}{4} \times 1$	$2\frac{1}{2}$ x 2 x $1\frac{1}{2}$

For a working pressure of 200 pounds.

Our Extra Heavy Fittings are made with a longer radius than the ordinary fittings, thus reducing friction. We do not recommend the use of screwed fittings above 10 inches. For larger sizes flanged are more suitable.

When Tees are made reducing on the run, the center to center and face to face measurements are the same as given in the above table; but when the outlet is reduced these measurements vary with the size of the outlet.

In ordering flanged fittings, customers must specify if they are wanted with flanges drilled.

Flanged fittings will always be furnished faced only unless otherwise ordered.

#### PLEASE READ THIS NOTICE WITH CARE.

To construct a Railing two pipes high, the upper outlet of all fittings used in lower pipes should be tapped with left-hand thread. but when orders are sent us without specifying how outlets are to be tapped, all fittings will invariably be furnished right-hand.

As the fittings do not need to be steam or water-tight, a sufficiently clean thread to screw up well and make a good job can be made by running a left-hand tap into any outlet tapped right-hand.

A neat and simple gate can be made by reducing with a bushing the outlets of the fittings on each side of the passageway, and then using a smaller size pipe to slide back and forward inside of the top rail, with a pin to prevent its running back too far. (See dotted line in cut.)

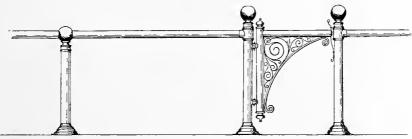

FIG. 205. DESIGN FOR BRASS RAILING

Prices on Brass Posts, Gates, and all trimmings furnished upon application.

WEIGHT PER FT. LBS. PER POUND															

These Tubes are kept in stock up to 4 inch in 12-foot lengths. Special lengths to order.

We can furnish Copper Tubes same sizes as above. Brass and Copper Tubes are always shipped without threads or couplings, unless otherwise specified. Threads and couplings always charged extra.

#### SCREWED FOR IRON PIPE.

The necessity for better and safer House Drainage has induced Sanitary Engineers to recommend and adopt Wrought-Iron Screwed-Jointed Pipes in place of the ordinary Cast-Iron Lead-Jointed Soil Pipes, preventing thereby accumulation of Sewer Gas in houses, caused by leaky lead joints.

We manufacture Drainage Fittings which are specially adapted to the new system of House Drainage.

These Fittings have an interior shoulder, and are made with same inside capacity as the inside diameter of the Pipe, thus securing an unobstructive interior surface, allowing all solid matters to pass without choking up the Pipes.

The Fittings are coated with heated Asphaltum.

FIN'D BRASS, WITH GAGE COCK AND WATER GAGE _ EACH	85,00		80.00	100.00	95.00						125.00

### DESCRIPTION.

NUMBER	1	$1\frac{1}{2}$	2	5	6	7	9	11	13	15	Government Column.
DIMENSIONS OVER ALL	33 x 23	44 x 28	34 x 23	44x294	4½ x 27						$4\frac{1}{2} \times 30$
DIAMETER BOILER (MAXIMUM)	54	54	60	Any Diameter.	Any Diameter.						Any Diameter.
STEAM PRESSURE, LBS. (MAXIMUM)	80	150	100	Any Pressure.	Any			~ ~			Any Pressure.
SIZE BOILER CONNECTIONS	1	11	1	$1\frac{1}{4}$	$1\frac{1}{4}$	$1\frac{1}{2}$	$1\frac{1}{2}$	$1\frac{1}{2}$	$1\frac{1}{2}$	$1\frac{1}{2}$	$1\frac{1}{4}$
VARIATIONS BETWEEN ALARMS INCHES	6	6		8		$12^{-}$	18	24	30	36	8
LENGTH OF GLASS	12	12	12	16	16	18					16
DISTANCE BETWEEN GAGE COCKS	3	3	3	4	4	6					4
SIZE TRIMMINGS	1 2	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{3}{4}$	3 4	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$	$\frac{3}{4}$

Numbers 9, 11, 13, and 15 are for use on vertical boilers; all other sizes for horizontal boilers.

Note.—When not otherwise stipulated, we ship the columns trimmed, with gage cocks and water gage. When ordering, state whether right or left hand columns are wanted. A column having gage cocks on the left-hand side when looking at the glass, which is on the front, is a left-hand column, and vice versa.

# EDSON'S PRESSURE-RECORDING AND ALARM GAGE.

FOR RECORDING STEAM, WATER, GAS, NATURAL GAS, AIR, AMMONIA, OIL, BLAST-FURNACE, AND PIPE-LINE PRESSURE.

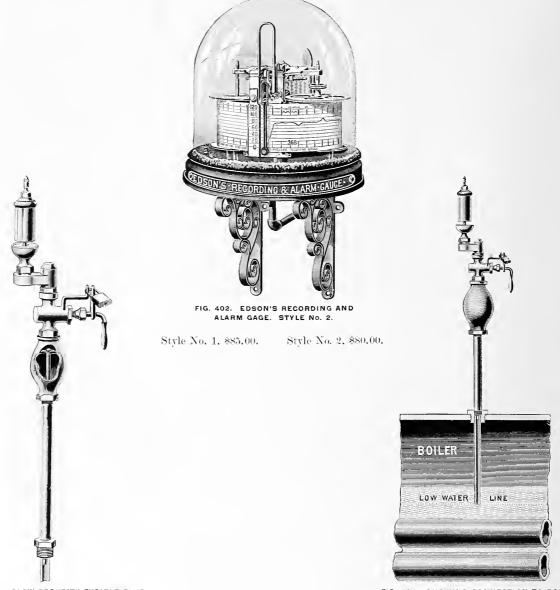

FIG. 403. CLOW SECURITY FUSIBLE PLUG.

FIG. 404. SHOWING CONNECTION TO BOILER.

# CLOW SECURITY FUSIBLE PLUG AND LOW-WATER ALARM.

Our Alarm is a positive indicator of low water. When the metal fuses, it is forced by the pressure of escaping steam into upper part of the offset, and the steam free of the metal operates the whistle, thus securing an absolutely sure and safe Low-Water Alarm. Directions for attaching and operating accompany each Alarm.

Complete, with Lock and Key, each, \$10.00.

Extra Fusible Plugs, each, 50 cents.

FIG. 405. LOW PRESSURE GAGE.

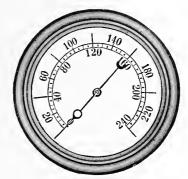

FIG. 406. HIGH PRESSURE GAGE.

# STEAM PRESSURE OR VACUUM GAGES.

SPECIAL WIDE TOP CURVED RADIATOR.

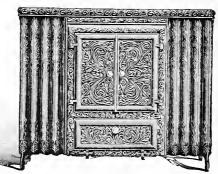

FIG. 503. PERFECTION. DINING ROOM RADIATOR.

For List of Sizes, see page 119.

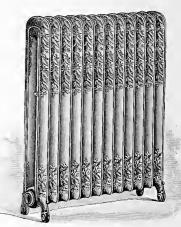

FIG. 504. IDEAL.

Heights for steam and water, 45, 38, 32, 26, 23, and 20 inches. Loops,  $7\frac{2}{3}$  inches wide. Width of legs,  $8\frac{1}{2}$  inches.

#### CLOW PATENT LEAD PIPE CONNECTION.

SHOWING CORPORATION COCK AND ROUND-WAY STOP, WITH LEAD PIPE CONNECTED.

We guarantee a joint made with this Connection is stronger and more durable than the regular solder joint, and much cheaper. Any one capable of tapping a main can make a perfect joint with this Connection in a few minutes, and in any place where lead and iron pipe are to be connected it will be found more satisfactory and cheaper than the solder joint.

Slabs ordered without Backs or Sides cost more per square foot.

Slabs for Combination Cocks and Oval Bowls must not be less than 22 inches wide.

All Slabs have 8-inch Backs, unless otherwise ordered.

In ordering Slabs be particular to state size, kind of Marble, number of Cock Holes, if for Chain Stay and Clamps, size of Bowl, and whether round, oval, or square.

In calculating measurements add one inch to each finished edge.

We carry in stock every size named in our list in Italian Marble, cut with two Cock Holes, 14-inch Round Bowl, and for Basin Clamps. When wanted for one Cock Hole the same Slab can be used by using either a Chain Stay (see Fig. 857) or Cock Hole Plug (see Fig. 862).

\* All sizes marked we carry in Dark Tennessee Marble, cut as above, with either 8-inch or 10-inch Backs.

Average weight of Marble Slabs boxed,  $12\frac{1}{2}$  pounds per square foot.

#### MARBLE.

FIG. 1068. RECESS SLAB WITH BACK AND TWO ENDS

This Slab finishes flush with the wall. Recess Slabs vary so in size that a table of measurements would be of no benefit.

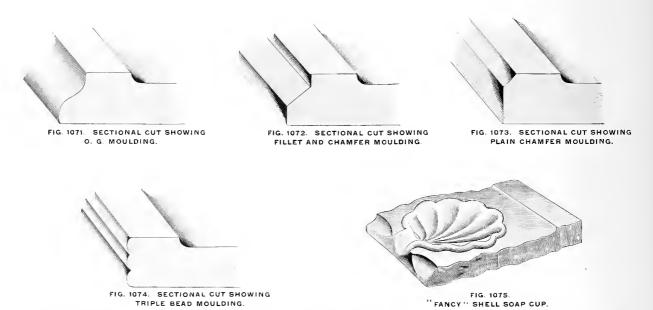

FIG. 1069. RADIATOR TOP.

In measuring allow about \( \frac{3}{4} \) inch projection all around. We strougly recommend the use of Pink Knoxville or No. 2 Tennessee Marble for Radiator Tops. It presents a very handsome appearance and does not stain. They also make good Radiator Bottoms.

FIG. 1070. MARBLE FLOOR SLAB FOR CLOSETS.

Floor Slabs for Closets, Lavatories, or Bath Tubs will always be sent with unpolished square edges and corners. Where Slabs are to be drilled for pipes, diagram should be furnished giving exact distances to centers of openings.

We are prepared to furnish Lavatories in the following grades of Fancy Marbles: African St. Baume, French Jasper, Rouge Royal, American, Tennessee, Florence, Italian, and Florentine. Mexican, Arizona, and Algerian Onyx.

# CLOW'S "ROMAN" PORCELAIN BATHS.

complete,	95.00	140.00	195.00	250.00	305.00	360.00	415.00	470.00	525.00	580.00

Our Siphon Jet Urinal Stalls are fitted complete with Supply and Waste Pipes of Galvanized Iron back of Marble and Nickel-plated Brass Supply and Flush Pipes above Marble. Every Stall is set up complete and tested before shipping. The Urinals contain sufficient water to prevent any odor, and the strong Automatic Flush and Siphon Jet earry away any substance that may be thrown in the Urinal.

We recommend this Urinal as being very much superior to any other pattern.

#### CLOW'S URINAL STALLS.

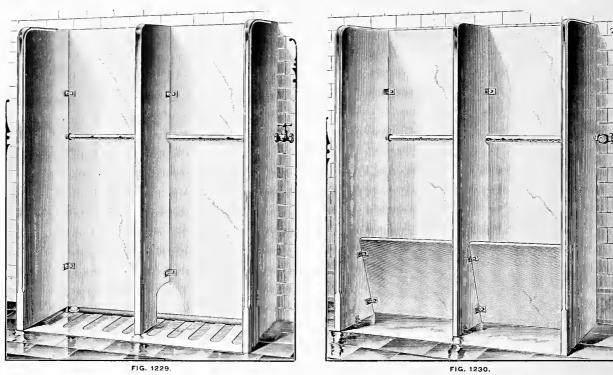

Fig. 1229 includes Italian Marble Urinal Stalls, Partitions and Ends Polished Both Sides, Back Polished on One Side, Base Countersunk and Grooved, Nickel-plated Brass Perforated Flush Pipe, Lock Key Cock, Clamps, Bolts, and Raised Strainer.

Fig. 1230, same as Fig. 1229, with Italian Marble Splash-board, as shown,

Dimensions of Urinal Stalls: Height, 5 feet; width, center to center, 2 feet; depth, Ends, 2 feet; Partitions, 1 foot 8 inches; thickness, Ends, Partitions, and Backs, 4 inch; Base, 14 inch.

If with Soap Cups, add 75 cents each; if with Ash Covers, add for each part \$1.50.

Tubs with Faucet Holes will be sent unless otherwise ordered.

Our Laundry Tubs have always been thoroughly well made, and have given perfect satisfaction. Patents have recently been granted us covering the valuable improvements shown in cut. The Zinc Top is so placed that the cement fills the inner portion and so surrounds the outer part that it is impossible for it to become loose. The Single Outlet Connection considerably lessens the cost of connecting up the Tubs, and as space occupied by the Pipe and Fittings is very small, the Tub is not weakened in any part.

The price of these Tubs is almost the same as common Wood Wash and do not become foul, they are now being used almost exclusively. They are made in one solid piece, so there is

no possibility of leaking, so common with all other kinds of Wash Trays.

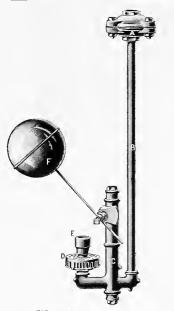

FIG. 1482. CLIMAX DRAINER, WITH AUTOMATIC ATTACHMENT.

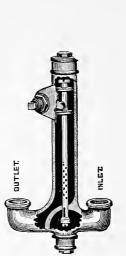

FIG. 1483. SECTIONAL VIEW OF DRAINER VALVE.

FIG. 1484. CLIMAX DRAINER, WITHOUT AUTOMATIC ATTACHMENT.

# CLIMAX DRAINERS .- Figs. 1482 and 1484.

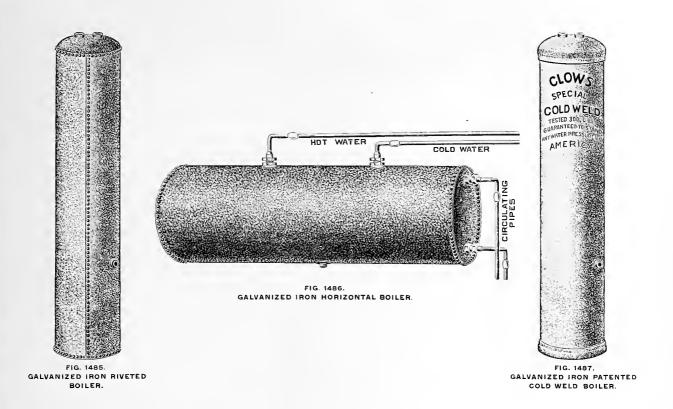

NUMBER	1	3	3	4	5	6
CAPACITY GALLONS PER HOUR WITH AUTOMATIC MOVEMENT - EACH WITHOUT AUTOMATIC MOVEMENT - EACH	50 25.00 15.00	$100 \\ 40.00 \\ 25.00$	150 55.00 35.00	200 80.00 50.00	275 110.00 70.00	350 160.00 100.00

The capacity given above is based on a pressure of from 15 to 20 pounds, and on a lift of from 6 to 7 feet. The capacity

depends entirely on the amount of water-pressure obtainable and lift.

The Climax Cellar Drainer is made for draining Cellars. Wheel Pits, Furnace Pits, etc., at the least possible expense and in a permanent and positively satisfactory manner. It is also desirable and largely used for removing waste-water from kitchens below level of sewer and removing drippings from ice boxes, and for any purpose where it is necessary to remove water economically from one level to a higher one.

In American Hydrants and Street Washers the water passes through an inner pipe. The Hydrants are east in one piece. There is no packing in top parts, and they can be repaired without digging up.

If Hydrants and Street Washers are desired for Iron Pipe Connections, order them with thread on couplings, for Iron Pipe. We recommend these Hydrants and Street Washers. They are heavy and thoroughly well made.

In Ideal Hydrants and Street Washers the water passes through an inner pipe. There is no packing in top parts, and they can be repaired without digging up.—If Hydrants are desired for Iron Pipe Connections, order them with thread on couplings for Iron Pipe.

The Waste Chamber has a clear area equal to the area of the inner pipe.

Special sizes made to order.

This Hydrant is designed to be placed horizontally in the wall of a building, thereby offering no obstruction to a yard or lawn. The outside end of Hydrant is made of brass, to prevent the possibility of staining stone through corrosion. The face or front of brass head is highly polished, making a neat finish and appearance. Inside of Hydrant is fitted with Compression Valve and a bent coupling for lead or iron pipe, and also with a jam nut to screw, so that ontside end of Hydrant can be brought tight and flush with outside of wall, and Hydrant held in a firm position. It can be repaired without taking out of wall.

Nut for opening and closing valve is flush with face, and can only be operated with a key made specially for this purpose.

When ordering Hydrants give following details: Size and form of Nut to open Hydrant; number and size of Nozzles; length from pavement to bottom of connection; size of connection to main, and whether it is desired to open Hydrants by turning to the right or left. In sending gauge for Hydrants we always prefer a Hydrant Cap, as this should give both thread of Nozzle and size and style of Nut. We carry constantly in stock, and term our standard pattern Hydrant, Five-foot Double Diseharge, 2½-inch Nozzles, 4-inch hub inlet Hydrants, Pentagon Nut, 4-inch sides, made to open turning to the left, and Chicago Standard Hose Thread. We recommend this pattern to all new companies.

Gas companies who light their lamps by opening the door do not realize how much time and money they waste. The lamplighters of Chicago light eighty to one hundred lamps in forty-five minutes by the use of these Torches. The keys in the cocks should be oiled about once in six months. Use kerosene or mix with lard oil.

CLOW WATER CONNECTIONS.-Fig. 1643.

FIG. 1643, CLOW WATER CONNECTION.
PATENT APPLIED FOR.

This Connection is intended for use where a 1-inch Connection or larger is to be made and main cannot be tapped for Corporation Cock larger than  $\frac{3}{4}$  or 1 inch. The 1-inch Connection has two branches, the  $1\frac{1}{4}$  has three, and the  $1\frac{1}{2}$  Connection has four, all  $\frac{3}{4}$ -inch. The 2-inch Connection has four 1-inch branches,

When the Connection is set about 18 inches from the main, the distance between each tap in main would be about 12 inches.

The inlet Connections are all made for use with lead or iron pipe to the main, and have union joints. The outlet Connection is also made with union joint and for lead or iron pipe.

Wherever used they gave excellent satisfaction, and are a great improvement over the old method of making large connections, and are much cheaper.

Five and Six Ply Hose made to order at an advance of 25 and 50 per cent on Four-Ply prices.

We make the following brands of Rubber Hose, Three-Plv, subject to guarantee as below, for one season:

B. W. H. Brand guaranteed 150 pounds pressure.
Superior Brand guaranteed 100 pounds pressure.
Bay State Brand guaranteed 75 pounds pressure.
Tiger Brand guaranteed 50 pounds pressure.
Competition Brand not guaranteed.

Should any Hose be returned claimed defective, we will test it on pumps erected for this purpose, and if it will not stand pressure as guaranteed, will credit; if, however, it stands the pressure named, no credit will be given.

This Covering is made of the best grade of Mineral Wool, Asbestos Lining, and Muslin Jacket. Made in 3-feet sections to fit all size pipes. Any one can apply it.

Covering for Boilers, Domes, Breeching, Heaters, Tanks, etc., made in blocks 18 x 8 inches (one square foot), price 30 cents each.

Elbow and Tee Molded Covers are not made of this Covering. If Sectional or Molded Elbow and Tee Covers are wanted, the Reed Covers (as shown above) can be used. Elbows and Tees may be covered by using loose materials, viz.: Asbestos Paper, Mineral Wool, and Muslin Jacket made up on the fittings, or they may be covered with Asbestos Cement.

One barrel of Asbestos Cement will cover about 60 fittings, sizes 1 to 4 inches.

FIG. 1673.

This Covering is made of a select grade of Hair Felt, with Asbestos Lining and Corrugated Paper Jacket. Made in 3-feet sections to fit all size pipes. For low pressure steam, and hot and cold water pipes.

Elbow and Tee Molded Covers are not made of this Covering. If Sectional or Molded Elbow and Tee Covers are wanted, the Reed Covers (as shown above) can be used. Elbows and Tees may be covered by using loose materials, made up on the fittings, viz.: Asbestos Paper, Hair Felt, and Blue Corrngated Paper, or they may be covered with Asbestos Cement.

One Barrel of Cement will cover about 60 fittings, sizes 1 to 4 inches.
Asbestos Cement for covering Boilers, Domes, Drums, Breeching, Tanks, etc., price per barrel, \$4.00.

One barrel will cover about 25 square feet 11 inches thick.

SUCTION PIPE	 	INCHES	11 11
EACH	 		13.00 $15.50$

Fig. 1683 Force Pump is the most popular style made. It is easily worked and used in wells not exceeding 30 feet deep. It is an excellent Pump for watering lawns, washing windows, or for fire protection. It is fitted complete with wrought-iron set-length 4 feet from base and hole drilled to allow water to run out below the freezing point.

Fig. 1684 Pump is one of the best Force Pumps made, having the Air Chamber on spout instead of in the stock, makes a more handsome appearance than Fig. 1683, and by many is preferred on this account.

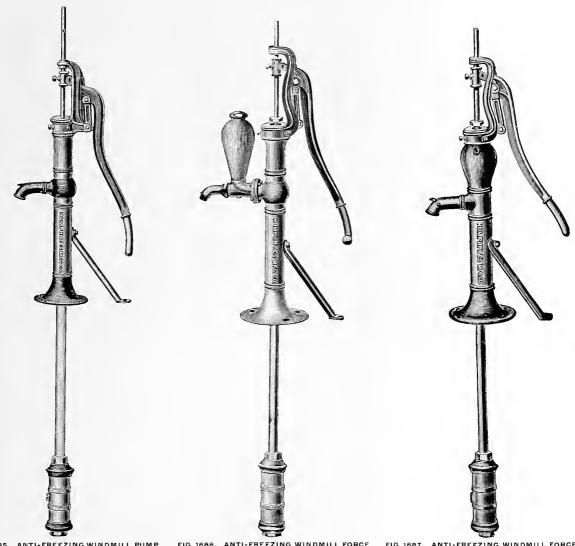

FIG. 1685. ANTI-FREEZING WINDMILL PUMP, FIG. 1686. ANTI-FREEZING WINDMILL FORCE FIG. 1687. ANTI-FREEZING WINDMILL FORCE WITH CONNECTING PIPE. PUMP, WITH CONNECTING PIPE. PUMP, WITH CONNECTING PIPE.

#### ANTI-FREEZING WINDMILL PUMPS .- Figs. 1686 and 1687.

CYLINDER 3½ x 10 INCHES EACH	16.00 13.50

Fig. 1686 represents the same Pump as is illustrated under Fig. 1684 (see page 400), but with the addition of a Windmill Head, making it work much more easily, and with less wear on the working parts.

Fig. 1687 represents the same Pump as is illustrated under Fig. 1683 (see page 400), with the addition of a Windmill Head, making it work much more easily, and with less wear on the working parts. It is also fitted with back outlet opposite the spout, so it can be used to pump water into tank by closing spout.

#### IMPROVED HYDRAULIC RAMS.-Fig. 1719.

NUMBER	2	3	1	5	6	17	8
QUANTITY WATER FURNISHED TO RAM PER MINUTE, GALLONS LENGTH OF DRIVE PIPE FEET			3 to 7 25 to 50	6 to 10 25 to 50		25 to 45 25 to 50	25 to 75 25 to 50
SIZE OF DRIVE PIPE INCHES   SIZE OF DISCHARGE PIPE INCHES   EACH INCHES	$\frac{\frac{4}{1}}{\frac{1}{2}}$ 9.00	$\frac{1}{\frac{1}{2}}$ 11.00	$\frac{14}{3}$ $\frac{3}{4}$ $14.00$	$\overset{z}{\overset{1}{1}}$	$1\frac{1}{4}$ $40.00$	$1\frac{1}{2}$ $75.00$	$\frac{0}{2}$ 125.00

#### RULE TO FIND HOW MANY GALLONS OF WATER PER MINUTE CAN BE RAISED BY OUR HYDRAULIC RAM.

Multiply the quantity supplied by the Spring (in gallons per minute) by 65. Multiply this product by the "Head," or numbered feet in the fall; then divide by 100 times the height to which the water is to be elevated. The result will give the quantity of water raised per minute in gallons or fraction of gallons.

#### GREENHOUSE AND GAS DRIP PUMPS .- Figs. 1718 and 1720.

FIG. 1718. COMPLETE, WITH SUCTION	HOSE AND DISCHARGE PIPE	EACH 9.00
FIG. 1720		EACH 15.00

Fig. 1718 represents our New Double-Acting Portable Hand Force Pump, fitted with Suction Hose, to draw water or other liquids from a pail or other source of supply, and Discharge Hose, with a Nozzle and Rose Sprinkler for distributing the same for whatever purpose desired.

Fig. 1720 is constructed of Brass, has Stuffing Box at top to prevent overflow, and is designed particularly for pumping gas drips. Length of Piston Rods, 13 inches; length of Pump (over all), 24 inches; diameter of Cylinder (inside), 2 inches. Fitted for \( \frac{3}{4} \) or 1 inch iron pipe, as ordered.

FIG. 1687.	CYLINDER 3 x 10 INCHES	

Fig. 1686 represents the same Pump as is illustrated under Fig. 1684 (see page 400), but with the addition of a Wind-

mill Head, making it work much more easily, and with less wear on the working parts.

Fig. 1687 represents the same Pump as is illustrated under Fig. 1683 (see page 400), with the addition of a Windmill Head, making it work much more easily, and with less wear on the working parts. It is also fitted with back outlet opposite the spout, so it can be used to pump water into tank by closing spout.

				-			
NUMBER	2	3	4	5	6	7	8
QUANTITY WATER FURNISHED TO RAM PER MINUTE, GALLONS LENGTH OF DRIVE PIPE FEET SIZE OF DRIVE PIPE INCHES			$\begin{array}{c ccccccccccccccccccccccccccccccccccc$				
SIZE OF DISCHARGE PIPE INCHES	9.00	11.00	14.00	22.00	40.00	75.00	125.00

#### RULE TO FIND HOW MANY GALLONS OF WATER PER MINUTE CAN BE RAISED BY OUR HYDRAULIC RAM.

Multiply the quantity supplied by the Spring (in gallons per minute) by 65. Multiply this product by the "Head," or numbered feet in the fall; then divide by 100 times the height to which the water is to be elevated. The result will give the quantity of water raised per minute in gallons or fraction of gallons.

#### GREENHOUSE AND GAS DRIP PUMPS .- Figs. 1718 and 1720.

FIG. 1718.	COMPLETE, WITH SUCTION	HOSE AND DISCHARGE PIPE	EACH	9.00
FIG. 1720			EACH	15.00

Fig. 1718 represents our New Double-Acting Portable Hand Force Pump, fitted with Suction Hose, to draw water or other liquids from a pail or other source of supply, and Discharge Hose, with a Nozzle and Rose Sprinkler for distributing the same for whatever purpose desired.

Fig. 1720 is constructed of Brass, has Stuffing Box at top to prevent overflow, and is designed particularly for pumping gas drips. Leugth of Piston Rods, 13 inches; length of Pump (over all), 24 inches; diameter of Cylinder (inside), 2 inches. Fitted for \(\frac{3}{4}\) or 1 inch iron pipe, as ordered.

#### MELTING FURNACES .- Figs. 1804 and 1805.

1	2
 EACH 35.00	30.00 45.00
EACH 50.00	45.00

The No. 1 Furnaces are the standard size, and can be used on the largest work, while the No. 2 are designed for lighter service.

Having a large demand for a good Melting Furnace, we have designed and are now manufacturing the above patterns, and believe them to be the most perfect Melting Furnaces ever made. They are strictly first-class in every particular, and very strong in all parts. The smoke-pipe is arranged to give the best possible draft. They can be taken from one place to another without drawing the fire, and with the melted lead in the pot, a flange being east on the inside rim of pot, preventing the lead from wasting. They will pay for themselves in time saved.

TAR MELTING FURNACES .- Fig. 1806.

н		The second secon	
	PRICE, COMPLETE		135.00

This is designed to meet a long-felt want for a thoroughly reliable Tar Melting Furnace. Like our Lead Melting Furnaces, it is constructed of the best material, and gives excellent satisfaction.
